400L GRANULAR HOPPER

GH400

[GH400 400L GRANULAR HOPPER]

The GH400 is a compact, modular and highly configurable small hopper designed for a variety of applications and machines. Featuring the DSX metering system, the GH400 is pressurised and capable of distributing a variety of products.

The metering system is controlled by RDS Artemis ISOCAN Monitor or ISOBUS and features Touch Button Calibration.

400L GRANULAR HOPPER

GH400

GH400-A

AIRFLOW

The GH400-A uses the DSX turbine and distribution to act as a third or fourth tank.

GH400-O

OUTLET

Functioning as a standalone seeding hopper, the GH400-O features a turbine and an integrated distribution box suitable for 4-12 outlet machines.

GH400-D

DISTRIBUTION

Equipped with a turbine and distribution heads to serve as a standalone seeding hopper for high outlet machines (14-64).

400L GRANULAR HOPPER

GH400-A

Compatible with the DSX, the GH400-A uses the DSX turbine and distribution to act as a third or fourth tank.

400L PRESSURISED HOPPER

Ideal for micro-granular fertiliser, slug pellets, Avadex and small seeds.

DSX METERING UNIT

0.5kg per/ha achievable

INJECTOR BOX

Allows selective seeding

400L GRANULAR HOPPER

GH400-O

Designed for use with the PPX and SPX, the GH400-O is a standalone seeding hopper that features a turbine and integrated distribution box suitable for machines with 4-12 outlets.

400L PRESSURISED HOPPER

Ideal for micro-granular fertiliser, slug pellets, Avadex and small seeds.

INTEGRATED TURBINE

OUTLET BOX

Integrated distribution
